

# Expect...Support (Instruct)...Succeed

### Assessments AND Prescriptions

#### Assessments

Orchard's comprehensive content is organized into grade- and subject-specific assessments and prescriptions. Schools receive Common Core and state-specific assessments designed to identify areas of academic weakness and create individualized learning paths for every student.

#### Prescriptions

Students are not only assessed on your standards, they are assigned instructional lessons that incorporate 21st Century curriculum and depth-of-knowledge skills. Assignments include tutorials, application activities, interactive games, printable worksheets, mastery tests, and much more.

Lessons include writing, new question types, and performance tasks that ask students to demonstrate an array of research, writing, and problem solving skills.

#### Benchmarking

Pre- and Post-tests are excellent benchmarking tools, and provide detailed data by standard. Questions are randomly generated, ensuring authentic results.

TARGETED INSTRUCTION ASSESSMENT DATA MANAGEMENT

**Orchard Software is** a powerful and cost effective solution for your school or district. Our combination of national and state-specific assessments with targeted instruction and datadriven management tools is delivered at a great price for every school. Shouldn't your school join the community of over 7.000 schools that benefit from our award-winning

software?

# Targeted Instruction for Intervention and Improvement

## **Comprehensive Coverage** of Key Reading, Language, Math, and Science Skills in Grades K-9 and Beyond

Orchard offers over 5,000 essential skills and concepts most commonly found in the Common Core and state standards, and assessed on high-stakes tests. Stroll through our Orchard and explore curriculum designed for instructional intervention and improvement.

Curriculum design and lesson planning based on sound pedagogical principles, practices, and high standards

ELL Appropriate - K-12+

Fluency - Vocabulary - Comprehension

#### Use Our Standards-based Assessment to Inform Instruction...

Orchard's assessments are based upon Common Core and state standards, and provides a powerful interim benchmarking assessment tool that informs and assigns targeted standards-based instruction for all students.

| Orchard Correl                     | ation to the Common Core State Standards K  | 12 Orchard  |

Students begin by taking a grade-specific and subject-specific assessment based upon their state standards (example: Orchard for Texas Math Grade 4), that assesses which standards the student has mastered and which standards he/she is struggling with. Orchard then automatically creates a customized learning plan for the student by assigning specific instructional programs based on identified problem areas.

#### ...or, Create Your Own Targeted Assignments

Of course, no one knows a student's specific needs better than his/her teacher. That's why Orchard also includes a built-in state-specific database. Teachers who want to get more involved with Orchard implementation can use this tool to create personalized assignments that teach the standards they know their students are struggling with.

Interim Assessments and Assignments

#### Balanced Approach to 🦊 Instruction

Orchard believes in a balanced approach to instruction. That's why we offer computational and conceptual math programs, reading programs that range from phonemic awareness to high-level comprehension skills, and language programs that teach grammar, usage, and mechanics as well as the writing process.

## Motivating Students to Learn

Orchard knows that all students do not learn the same way. We use a wide variety of instructional approaches to meet individual learning needs with an emphasis on motivating students to come back for more time-on-task learning.

> Instruction incorporates writing, critical-thinking skills, and real-world problems > Identify areas of need, as well as where students are excelling

Subgroup Comparison Reports compile student data by subgroups and compares it to the overall performance of a whole school, a valuable resource for ELL and Special Education.

#### Reporting

- ✓ Standards Reports measure mastery of specific skills and standards at the student. class, school, and district levels.
- Portfolio Reports include student recordings. openended responses, and journal entries.
- Student Progress Reports provide detailed data, including the date, time-on-task, and performance data for the assignment, with links to test questions, answers, and state standards.
